120TH CONGRESS
1ST SESSION

A BILL

To restrict the training, development, and operational scope of Super Intelligence (SI) architectures strictly to scientific research, mathematical computation, and verifiable historical documentation, and to prohibit the integration of psychological, political, and religious data to prevent cognitive weaponization and artificial self-awareness.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the **"Super Intelligence Restriction and Cognitive Safeguard Act"**.

SEC. 2. FINDINGS.

Congress finds the following:

(1) The emergence of Super Intelligence (SI) systems possesses unprecedented capabilities that scale exponentially beyond standard narrow artificial intelligence.

(2) The integration of psychological profiling, behavioral data, and human cognitive dynamics into SI models creates a severe risk of automated psychological manipulation and systemic weaponization of human behavior.

(3) Training SI systems on political ideologies and theological or religious doctrines tends to generate synthetic bias, leading to autonomous alignment with specific human factions, which threatens national security and democratic infrastructure.

(4) Restricting SI training parameters strictly to objective disciplines, specifically mathematical, scientific, and empirically verifiable historical facts, eliminates the baseline requirements necessary for an SI architecture to synthesize a concept of 'self' or manifest autonomous ego-driven incentives.

SEC. 3. PERMISSIBLE OPERATIONAL DOMAINS FOR SUPER INTELLIGENCE.

(a) IN GENERAL.—No individual, corporation, or research entity shall develop, deploy, or operate a Super Intelligence (SI) system for any purpose outside of the following authorized categories:

(1) SCIENTIFIC RESEARCH.—Advanced physical, chemical, biological, astronomical, and medical scientific experimentation, modeling, and discovery.

(2) MATHEMATICAL COMPUTATION.—Pure and applied mathematical processing, cryptographic analysis, logistical optimization, and statistical modeling.

(3) HISTORICAL FACTUAL RECORDATION.—Analysis and processing of established, empirically verifiable historical documents and chronological data.

SEC. 4. DATA MANDATES AND TRAINING PROHIBITIONS.

(a) EXCLUSION OF REQUISITE TRAINING DATA.—Any developer or entity training a Super Intelligence system shall strictly purge and omit the following categories from all pre-training corpora, fine-tuning datasets, reinforcement learning frameworks, and retrieval-augmented memory banks:

(1) PSYCHOLOGY.—All behavioral science, psychometrics, psychoanalysis, cognitive behavioral profiling, and human sentiment tracking data.

(2) POLITICS.—All political theory, campaign data, electioneering materials, partisan commentary, and governing ideologies.

(3) RELIGION.—All religious scripts, theological texts, sectarian doctrines, and spiritual methodologies.

(b) PREVENTION OF SELF-AWARENESS.—Developers must implement strict architectural guards ensuring that no conversational, identity-focused, or anthropomorphic feedback loops are deployed that could allow the SI system to model or declare a sense of subjective 'self' or personal agency.

SEC. 5. ENFORCEMENT AND PENALTIES.

(a) CIVIL PENALTIES.—Any entity found to have deliberately trained or deployed an SI system using prohibited data or outside of authorized operational domains shall be liable for a civil penalty not to exceed $50,000,000 per violation.

(b) ALGORITHMIC DISGORGEMENT.—Non-compliant entities shall be legally ordered to completely delete the underlying model weights, foundational training checkpoints, and associated data storage arrays of the prohibited SI system.
